

EQUIPMENT CATALOG

The hardware behind a monitored building.

Every device in this catalog reports into the same 24/7 care center: a live navigator answers, triages by severity, and leaves a documented response trail. Pendants and pull-cord replacements cover the resident, repeaters cover the building, and the base station carries the call.

IN THIS CATALOG

- | | |
|--|-----------|
| 01 Call for Aid Buttons
PULL CORD REPLACEMENT TRANSMITTERS | 2 devices |
| 02 Emergency Pendants & Wrist Transmitters
WEARABLE TRANSMITTERS | 5 devices |
| 03 Repeaters & Range Extenders
SIGNAL BOOSTERS FOR TRANSMITTERS | 1 device |

PROPERTY OFFICE HARDWARE | 2 devices |

01 — PULL CORD REPLACEMENT TRANSMITTERS

Call for Aid Buttons

Fixed and portable call for aid buttons for bathrooms, bedrooms, common areas, and staff stations. Waterproof. HUD-compliant. 10-year battery life. Self checking for performance.

PB-23

WIRELESS CALL FOR AID BUTTON

Single-press wireless call for aid button for critical situations such as a fall, medical event, or intrusion.

Wall or portable Single press Supervised signal

PB-15 Series

CALL FOR AID BUTTON SERIES

Wireless call for aid button family that lets residents and staff press for help in emergency situations from anywhere in coverage.

Multiple form factors Wireless Supervised signal

02 — WEARABLE TRANSMITTERS

Emergency Pendants & Wrist Transmitters

Wearable call for aid devices. Upgradable/optional two way communication devices (personal emergency response system) and location / fall functionality.

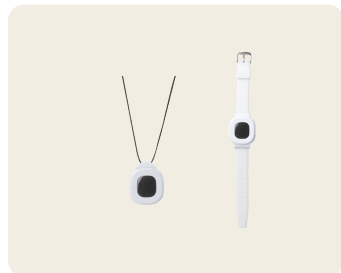

WTRSC-1

ONE-CLICK EMERGENCY PENDANT

Modern-looking emergency pendant with a patented One-Click design, letting residents switch between necklace and wristband wear without tools.

Necklace or wristband One-Click swap NFC option

BR1-WTRSB

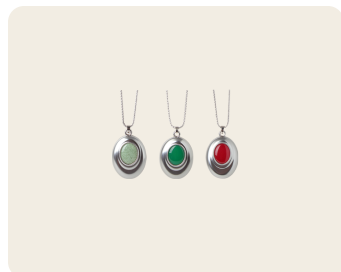

BLUETOOTH EMERGENCY PENDANT

Small wireless call for aid button that pairs with a smartphone app so residents can summon help while away from the building.

Bluetooth LE

Smartphone paired

On- and off-site use

JLPD-1

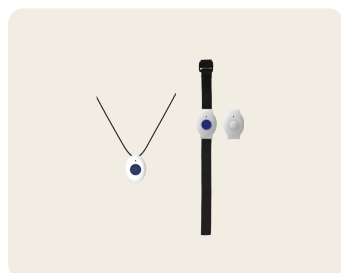

JEWELRY PENDANT COLLECTION

Stylish jewelry-grade housing over a durable emergency pendant, for residents who won't wear an obviously medical device.

Jewelry finish

Water resistant

Single-press alarm

WTRZ

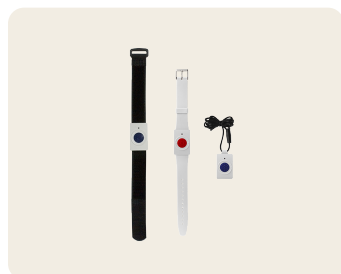

ERGONOMIC WEARABLE BUTTON

Ergonomically designed wearable emergency button built for comfort and all-day wear without bulk.

Lightweight

Ergonomic form

Long battery life

WTRQ3

COMPACT CALL TRANSMITTER

Compact pendant/wrist transmitter that lets residents summon help with one simple press.

Pendant or wrist

One-press alarm

Low-battery reporting

Repeaters & Range Extenders

Repeaters carry device signals across long corridors, thick walls, and multi-wing buildings so no unit sits outside coverage. Hardware not required for smaller buildings. No additional fees for hardware.

RP-29 Series

ADVANCED SF1/F1 REPEATER

Advanced repeater that boosts the range between gateway and sensors with SF1/F1 technology, including PIR camera compatibility.

SF1/F1 technology

PIR camera compatible

Extends RF range

Base Stations, Gateways & Receivers

The in property-office hub that answers the call, opens two-way voice, and reports every event to the 24/7 care center for immediate response. One base station needed per building. No additional fees for hardware.

PWSR-5-LT

OFFICE RECEIVER / GATEWAY

Wall-mounted office receiver that gathers signals from pendants, call for aid buttons, and pull cords across the property and hands every event to the care center, with LED status indicators for power, signal, and alarm state.

Office/staff station mount

LED status indicators

Property-wide signal receiver

GX-MAX Series

VOIP SMART CARE ALARM

All-in-one telecare base station with VoLTE/VoIP two-way voice, Bluetooth health-device pairing, and support for up to 100 wireless devices.

VoIP / VoLTE voice

BLE health devices

RF, ZigBee, Z-Wave, DECT

Not sure which mix your building needs?

Start with a free Property Risk & Opportunity Report.

We map your device mix, coverage gaps, compliance exposure, and the funding pathways available to your property — then show what a monitored building costs per door, per month.
